ANESTHETIC RELEASE FORM

Patient: _____.

It is important to us that your pet receives the safest anesthetics and analgesics available. However, it is possible that conditions, which are not visually apparent, may cause some problems, even in the outwardly normal dog or cat.

We offer the latest technology to safeguard your pet as much as possible. We are able to run computerized in-house blood chemistries within minutes, safely and accurately, just like the most modern "people hospitals". We screen to detect anemia, sub-clinical infections, and dysfunction of the liver and kidneys. **If your pet has not had any diagnostic lab work performed in the last month, the Doctors recommend having this test run on your pet.**

Please read the above carefully and initial your choice:

I DO wish the pre-op blood tests be performed on my pet. _____ INITIAL

I DO NOT wish the pre-op blood tests be performed on my pet. _____ INITIAL

FOR DENTAL PATIENTS, a plaque prevention gel is available. Do you wish to have your pet's teeth professionally sealed today? YES NO

FOR DENTAL PATIENTS, a canine dental vaccination is available. Do you wish to have your dog vaccinated today? YES NO

I assume full financial responsibility for this pet. I understand there is always a potential risk for the procedure.

Signed _____ Date _____

If you need to reach me today, please call _____.
